

**Welcome to WEEK 6 of the CTOM Virtual Summer Spon Club! Challenges can be completed by individuals, teams or a group of family members. Have fun with Spon Club by inviting friends and family to also complete the challenge... who is the most creative problem solver in your family?! Below is the information for week 6 of the Summer Spon Club!**

**YOUR SOLUTION MUST BE POSTED/ EMAILED BY 9/1!!!**

Welcome to the final week of our Summer Spon Club! We hope that you had so much fun, we certainly did! We are so proud of the creativity that we have seen over the last few weeks. Here is your final Summer Spon challenge! This week's challenge is a verbal hands-on spontaneous problem. You may have 1 minute to think, and 3 minutes to respond. Primary teams (K-2) may have 2 minutes to think and 5 minutes to respond. Primary teams may also have a piece of paper to write or draw their thoughts during think time. To solve this Spontaneous, you will need 4 pens (you may use any 4 writing utensils that you have), a golf ball, and a notecard. Primary teams may also use 2 additional items of their choice. You can record your responses on a piece of paper or record yourself giving as many responses as you can for the time allowed. **Your problem is to improvise or pretend that one or more of the items represent something. For example you could put two of the pens in parallel and say "railroad tracks"**. Remember, primary teams can use the two additional items of their choice. Good luck, have fun, and enjoy your final Summer Spon Problem!

Don't forget to comment on our Facebook post with your solution, send us a direct message (DM) on Instagram, and/ or email it to [rcunningham@ctom.org](mailto:rcunningham@ctom.org)! For information regarding photos/videos and their use, please see our website at: <http://ctom.org/summer-spon-club/>  
Good luck and HAVE FUN!
